

Foster Solomon Owusu ASARE

FRONTEND DEVELOPER

Internship from Apr 2027 · Alternance from Sep 2027

Lille, France | +33 7 80 88 59 45 | fostersoasare@gmail.com | fostersoasare.me | GitHub | LinkedIn

PROFILE

Self-taught frontend developer since 2020 who turns designs into pixel-perfect, accessible and high-performance web experiences with React, Next.js and TypeScript. I've built web products end to end for international startups, founded SyncStore and mentored developers through Dev Initiative. I'm now doing an MSc in Information Systems & Software Engineering at JUNIA and looking for an internship, then an alternance.

EDUCATION

MSc in Information Systems & Software Engineering · JUNIA Lille, France · Expected 2028
BSc Computer Science · KNUST Kumasi, Ghana · Expected 2027

EXPERIENCE

Fullstack Developer · Homebasket Kumasi, Ghana · Contract · Nov 2024 – Feb 2025

- Built the storefront for a foodstuff marketplace serving KNUST students, from browsing to checkout.
- Designed mobile-first layouts, since most students order from their phones between classes.
- Students order in a few taps, and the team runs the whole store from one screen.

Founder · Dev Initiative Jun 2024 – Present

- Teach aspiring developers to build production-style apps, from React UIs to NestJS and Spring Boot APIs.
- Run hands-on projects, code reviews and one-to-one mentoring that mirror real team workflows.
- Learners leave with real projects and the confidence to apply for developer roles.

Founder & Lead Developer · SyncStore Aug 2023 – Present

- Built checkout, inventory and reporting screens as an installable, fully offline PWA.
- Implemented product variants with unit conversion, per-location pricing and credit sales.
- Staff sell and restock offline on any device, with a UI simple enough to learn on day one.

SELECTED PROJECTS

Amethyst Suites & Dining — React · Framer Motion · Paystack PREVIEW

- Built a luxury hotel platform with room booking, live availability and payments.
- Implemented event ticketing with verification, a dining menu and a protected admin area.
- Designed immersive Framer Motion animations built on a documented design system.

Architecture Studio — Next.js · TypeScript · React Hook Form PREVIEW

- Designed an elegant showcase for contemporary architecture with rich project galleries.
- Added validated enquiry forms for contacting architects and a content admin panel.

Logicore — Next.js · TypeScript · Tailwind PREVIEW

- Built a logistics platform for managing shipments, service requests and client communication.
- Implemented real-time shipment tracking and an admin dashboard for orders.
- Optimised for performance and scalability across devices.
